| INTERESTS            | <b>Computer Networks and Operating Systems</b>  |                     |
| EDUCATION            | <b>Keio University</b> , Tokyo, Japan   |                     |
|                      | <b>Ph.D.</b> in Graduate School of Media and Governance, Cyber Informatics  | Apr 2009 – Mar 2012 |
|                      | Thesis: The Internet is not an Internet—Principles, Evasion and Implications for Transport Protocols  |                     |
|                      | <b>M.S.</b> in Graduate School of Media and Governance, Cyber Informatics   | Apr 2007 – Mar 2009 |
|                      | Thesis: Bidimensional-Probe Multipath Congestion Control for Shared Bottleneck Fairness   |                     |
|                      | <b>B.S.</b> in Faculty of Environment and Information Studies   | Apr 2003 – Mar 2007 |
|                      | Thesis: Fast Transport Layer Handover Using Single Wireless Interface   |                     |
| WORK EXPERIENCE      | <b>University of Edinburgh, School of Informatics</b> , Edinburgh, UK   |                     |
|                      | <b>Reader</b> (Associate Professor)   | Aug 2024 –          |
|                      | <b>Lecturer in Networked Systems</b> (Assistant Professor)  | Jan 2020 – Jul 2024 |
|                      | <b>Senior researcher</b> , NEC Laboratories Europe, Heidelberg, Germany   | Nov 2016 – Dec 2019 |
|                      | <b>Software engineer</b> , NetApp, Munich, Germany  | Dec 2014 – Oct 2016 |
|                      | <b>Research scientist</b> , NEC Laboratories Europe, Heidelberg, Germany  | Jul 2012 – Nov 2014 |
| OTHER EXPERIENCE     | <b>Visiting student researcher</b> , University College London (UCL), London, UK  |                     |
|                      | Advisor: Prof. Mark Handley   |                     |
|                      | Focus: Middlebox, Multipath Transport Protocol.   |                     |
|                      | <b>Research intern</b> , Nokia Research Center, Espoo, Finland  | Jul 2008 – Jan 2009 |
|                      | Advisor: Dr. Lars Eggert  |                     |
|                      | Focus: Multipath Transport Protocol.  |                     |
| AWARDS               | <b>Google Research Scholar Award</b> *  | Apr 2022            |
|                      | <b>Facebook Research Award</b> *  | Aug 2021            |
|                      | <b>Best paper award</b> , ACM SOSR'15 *   | Jun 2015            |
|                      | <b>Community award</b> , USENIX NSDI'12   | Apr 2012            |
|                      | <b>IRTF Applied Networking Research Prize (ANRP)</b> *  | Nov 2011            |
|                      | * as the sole recipient or lead author  |                     |
| SELECTED PROJECTS    | <b>Prism: Content-Aware Routing over TCP</b> NSDI'21  |                     |
|                      | Prism enables content-aware routing of arbitrary-sized, encrypted application data over TCP, unlike the existing systems that rely on a custom UDP-based protocol. Prism modernizes the TCP handoff in the aid of programmable switches for robust operation and conformance to relevant features in recent Linux kernels.  |                     |
|                      | <b>PASTE: A Network Stack for Non-Volatile Main Memory</b> HotNets'21, NSDI'18, HotNets'16, ATC'16  |                     |
|                      | PASTE is a network stack that offers unified abstractions of network and non-volatile main memory. It fills the gap between the storage and network stacks designed in isolation, and solves the problem with the costs of moving and transforming data between these stacks that are significant for non-volatile main memory that offers fast, byte-addressable persistence.  |                     |
|                      | <b>mSwitch: A Highly-Scalable, Modular Software Switch</b> SOSR'15, CCR'14, NSDI'14, SoCC'17  |                     |
|                      | mSwitch solves the scalability problem of existing software switches that is crucial to consolidate a large number of VMs or virtualized network functions by a novel packet forwarding algorithm and streamlined data path. It was initially designed for ClickOS, a tiny unikernel that runs Click, and MultiStack, a framework that runs multiple user-space network stacks. |                     |
|                      | <b>Middlebox Measurement for TCP Extensibility</b> IMC'11, NSDI'12  |                     |
|                      | This work was motivated by exploring viable design of Multipath TCP. It transmits various non-existent TCP traffic that mimics possible future TCP extensions to our server and examines on-path actions to the packets. This is the first work that examines in-depth middlebox behaviour prevalent in the Internet.   |                     |
| PROFESSIONAL SERVICE | <b>UNIVERSITY OF EDINBURGH</b>  |                     |
|                      | People and Culture committee  | 2022–present        |
|                      | Programming Club, organizer   | 2020–present        |
|                      | <b>PROFESSIONAL SOCIETY</b>   |                     |
|                      | ACM SIGOPS, CARES Committee co-chair  | 2023–present        |
|                      | IRTF ANRP Award Committee   | 2022–present        |

**CONFERENCE PROGRAM COMMITTEE**

ACM APSYS (2024), ACM HotNets (2024), ACM SIGCOMM (2024), ACM ASPLOS (2024), USENIX NSDI (2023), USENIX ATC (2017, 2018, 2020–2024), ACM HotStorage (2022–2024), ACM/IEEE ANCS (2018, 2021 (co-chair)), ACM CoNEXT (2021–2022), ACM EuroSys (2021, 2024–2025), ACM/IEEE SC (2019), ACM SOSR (2018), aCM EuroDW (2018, ACM/IEEE ToN (2017–2018)), ACM SOSP poster (2013)

|                              |  |                                     |
|------------------------------|--|-------------------------------------|
| <b>TEACHING</b>              | <b>Introduction to Programming (Informatics) Summer</b> , University of Edinburgh  | July 2021 and 2022                  |
|                              | <b>Computer Communications and Networks</b> , University of Edinburgh  | Spring 2021 and 2022, and fall 2022 |
|                              | <b>Data Structures and Programming</b> , Keio University   | Fall 2011                           |
|                              | <b>Fundamentals of Information Technology</b> , Keio University  | Spring 2011                         |
| <b>MENTORING</b>             | Eugenio Luo, Internship, EPSRC Vacation Internship project mentor  | Summer 2024                         |
|                              | Xinshu Ma, primary PhD supervision, University of Edinburgh  | Fall 2023                           |
|                              | Tianyi Gao, primary PhD supervision, University of Edinburgh   | Fall 2022                           |
|                              | Tianyi Gao, MSc and intern supervision, University of Edinburgh  | Spring 2022                         |
|                              | Steven W. D. Chien, Postdoc supervision, University of Edinburgh   | Spring 2022                         |
|                              | Shuo Li, primary PhD supervision, University of Edinburgh  | Fall 2021                           |
|                              | Shinichi Awamoto, primary PhD supervision, University of Edinburgh   | Spring 2021                         |
|                              | Shinichi Awamoto, intern at NEC, Tokyo University  | Fall 2019                           |
|                              | Yutaro Hayakawa, MSc thesis intern at NEC, Keio University   | Fall 2018                           |
|                              | Nanako Momiyama, intern at NEC   | Spring 2017                         |
|                              | Kenichi Yasukata, mentor at NEC  | Fall 2016                           |
|                              | Nanako Momiyama, remote BSc thesis supervision, Keio University  | Fall 2016                           |
|                              | Yutaro Hayakawa, BSc thesis intern at NetApp, Keio University  | Fall 2016                           |
|                              | Kenichi Yasukata, MSc thesis intern at NetApp, Keio University   | Fall 2015                           |
| <b>GRANTS</b>                | <b>GLOBAL</b>  |                                     |
|                              | <b>NetApp Faculty Fellowship</b> , \$50K, sole PI  | Jan 2023                            |
|                              | Towards Generic, Encrypted Datacenter Transport  |                                     |
|                              | <b>Google Research Scholar Award</b> , \$60K, sole PI  | May 2022                            |
|                              | Upcycling Packets as Persistent In-Memory Data Structures  |                                     |
|                              | <b>Facebook Research Award</b> , \$50K, sole PI  | Nov 2021                            |
|                              | Flexible transport scale-out with modern NICs  |                                     |
|                              | <b>UK/EU</b>   |                                     |
|                              | <b>EPSRC New Investigator Award</b> , £385K, sole PI   | Apr 2022 – Mar 2025                 |
|                              | NetPM: Co-designing Data Management and Networking Principles for Persistent Memory  |                                     |
|                              | <b>NCSC RISE Proof-of-Concept</b> , £45K, co-PI  | Oct 2021 – Mar 2022                 |
|                              | Follow on Project: Gupt - A Hardware Assisted Secure and Private Data Analytics  |                                     |
| <b>OTHER HONORS</b>          | <b>Nominee for Teaching Award</b> , Outstanding Course category, University of Edinburgh   | Apr 2023                            |
| <b>STUDENT SCHOLARSHIP</b>   | <b>Research Fellowship for Young Scientists (DC1)</b>  | Apr 2009 – Mar 2012                 |
|                              | Japan Society for the Promotion of Science, 9.2M JPY   |                                     |
|                              | <b>Excellent Young Researcher Overseas Visit Program</b>   | Apr 2010                            |
|                              | Japan Society for the Promotion of Science, 1M JPY   |                                     |
