

# Michio Honda

Room 1.02a, Informatics Forum, 10 Crichton Street, Edinburgh EH8 9AB, UK  
michio.honda@ed.ac.uk • +44 (0)131 650 2710 • <https://micchie.net>

INTERESTS	<b>Computer Networks, Operating Systems and Security</b>	
EDUCATION	<b>Keio University</b> , Tokyo, Japan	
	<b>Ph.D.</b> in Graduate School of Media and Governance, Cyber Informatics Thesis: The Internet is not an Internet—Principles, Evasion and Implications for Transport Protocols	Apr 2009 – Mar 2012
	<b>M.S.</b> in Graduate School of Media and Governance, Cyber Informatics Thesis: Bidimensional-Probe Multipath Congestion Control for Shared Bottleneck Fairness	Apr 2007 – Mar 2009
	<b>B.S.</b> in Faculty of Environment and Information Studies Thesis: Fast Transport Layer Handover Using Single Wireless Interface	Apr 2003 – Mar 2007
EMPLOYMENT	<b>University of Edinburgh, School of Informatics</b> , Edinburgh, UK	
	<b>Reader</b> (Associate Professor)	Aug 2024 – present
	<b>Lecturer in Networked Systems</b> (Assistant Professor)	Jan 2020 – Jul 2024
	<b>Senior researcher</b> , NEC Laboratories Europe, Heidelberg, Germany	Nov 2016 – Dec 2019
	<b>Software engineer</b> , NetApp, Munich, Germany	Dec 2014 – Oct 2016
	<b>Research scientist</b> , NEC Laboratories Europe, Heidelberg, Germany	Jul 2012 – Nov 2014
OTHER EXPERIENCE	<b>Visiting student researcher</b> , University College London (UCL), London, UK Advisor: Prof. Mark Handley Focus: Middlebox, Multipath Transport Protocol.	Apr 2010 – Sep 2010
	<b>Research intern</b> , Nokia Research Center, Espoo, Finland Advisor: Dr. Lars Eggert Focus: Multipath Transport Protocol.	Jul 2008 – Jan 2009
AWARDS	<b>Google Research Scholar Award</b> *	Apr 2022
	<b>Facebook Research Award</b> *	Aug 2021
	<b>Best paper award</b> , ACM SOSR'15 *	Jun 2015
	<b>Community award</b> , USENIX NSDI'12	Apr 2012
	<b>IRTF Applied Networking Research Prize (ANRP)</b> *	Nov 2011
	* as the sole recipient or lead author	
SELECTED PROJECTS	<b>SDT: Secure Datacenter Transport Protocol Design</b>	Oakland'26
	SDT is a new encrypted (meta) transport protocol design. It aims to replace TLS/DCTCP in the cloud with the performance properties of emerging datacenter transports like Homa. SDT refines the TLS record protocol with per-message sequence number space in the same session, while ensuring message uniqueness with transport protocol integration to prevent replay attacks. This design even enables SDT with a new transport protocol number to use existing TLS offload in commodity NICs.	
	<b>Prism: Content-Aware Routing over TCP</b>	NSDI'21
	Prism enables content-aware routing of arbitrary-sized, encrypted application data over TCP, unlike the existing systems that rely on a custom UDP-based protocol. Prism modernizes the TCP handoff in the aid of programmable switches for robust operation and conformance to relevant features in recent Linux kernels.	
	<b>PASTE: A Network Stack for Non-Volatile Main Memory</b>	HotNets'21, NSDI'18, HotNets'16, ATC'16
	PASTE is a network stack that offers unified abstractions of network and non-volatile main memory. It fills the gap between the storage and network stacks designed in isolation, and solves the problem with the costs of moving and transforming data between these stacks that are significant for non-volatile main memory that offers fast, byte-addressable persistence.	
	<b>mSwitch: A Highly-Scalable, Modular Software Switch</b>	SOSR'15, CCR'14, NSDI'14, SoCC'17
	mSwitch solves the scalability problem of existing software switches that is crucial to consolidate a large number of VMs or virtualized network functions by a novel packet forwarding algorithm and streamlined data path. It was initially designed for ClickOS, a tiny unikernel that runs Click, and MultiStack, a framework that runs multiple user-space network stacks.	
	<b>Middlebox Measurement for TCP Extensibility</b>	IMC'11, NSDI'12
	This work was motivated by exploring viable design of Multipath TCP. It transmits various non-existent TCP traffic that mimics possible future TCP extensions to our server and examines on-path actions to the packets. This is the first work that examines in-depth middlebox behaviour prevalent in the Internet.	
PROFESSIONAL SERVICE	<b>UNIVERSITY OF EDINBURGH</b>	

	People and Culture committee	2022–present
	Programming Club, organizer	2020–present
	<b>PROFESSIONAL SOCIETY</b>	
	ACM SIGOPS, CARES Committee co-chair	2023–present
	IRTF ANRP Award Committee	2022–present
	ACM SIGOPS, CARES Committee	2021–2022
	<b>CONFERENCE PROGRAM COMMITTEE</b>	
	USENIX OSDI (2025), ACM APSYS (2024), ACM HotNets (2024), ACM SIGCOMM (2024–2025), ACM ASPLOS (2024), USENIX NSDI (2023, 2026), USENIX ATC (2017, 2018, 2020–2024), ACM HotStorage (2022–2025), ACM/IEEE ANCS (2018, 2021 (co-chair)), ACM CoNEXT (2021–2022), ACM EuroSys (2021, 2024–2026), ACM/IEEE SC (2019), ACM SOSR (2018), ACM EuroDW (2018, ACM/IEEE ToN (2017–2018), ACM SOSP poster (2013)	
<b>TEACHING</b>	<b>Introduction to Programming (Informatics) Summer</b> , University of Edinburgh	July 2021 and 2022
	<b>Computer Communications and Networks</b> , University of Edinburgh	Spring 2021 and 2022, and fall 2022
	<b>Data Structures and Programming</b> , Keio University	Fall 2011
	<b>Fundamentals of Information Technology</b> , Keio University	Spring 2011
<b>MENTORING</b>	<b>UNIVERSITY OF EDINBURGH</b>	
	Elisaveta Lavrentieva, PhD supervision (50/50% with Marc Juarez)	Fall 2024
	Michael Zhang, Internship mentoring (ICSA Summer Internship)	Summer 2024
	Eugenio Luo, Internship mentoring (EPSRC Vacation Internship)	Summer 2024
	Xinshu Ma, PhD supervision	Fall 2023
	Tianyi Gao, PhD supervision	Fall 2022
	Tianyi Gao, MSc and intern supervision	Spring 2022
	Steven W. D. Chien, Postdoc supervision	Spring 2022
	Shuo Li, PhD supervision	Fall 2021
	Shinichi Awamoto, PhD supervision	Spring 2021
	<b>NETAPP</b>	
	Nanako Momiyama, BSc thesis supervision, Keio University	Fall 2016
	Yutaro Hayakawa, BSc thesis intern at NetApp, Keio University	Fall 2016
	Kenichi Yasukata, MSc thesis intern at NetApp, Keio University	Fall 2015
	<b>NEC LABS EUROPE</b>	
	Shinichi Awamoto, intern at NEC, Tokyo University	Fall 2019
	Yutaro Hayakawa, MSc thesis intern at NEC, Keio University	Fall 2018
	Nanako Momiyama, intern at NEC	Spring 2017
	Kenichi Yasukata, mentor at NEC	Fall 2016
<b>GRANTS</b>	<b>GLOBAL</b>	
	<b>NetApp Faculty Fellowship</b> , \$50K, sole PI	Jan 2023
	Towards Generic, Encrypted Datacenter Transport	
	<b>Google Research Scholar Award</b> , \$60K, sole PI	May 2022
	Upcycling Packets as Persistent In-Memory Data Structures	
	<b>Facebook Research Award</b> , \$50K, sole PI	Nov 2021
	Flexible transport scale-out with modern NICs	
	<b>UK/EU</b>	
	<b>EPSRC Core Equipment Award</b> , £50K (my share), Co-I	Jan 2025 – Jun 2026
	(my part) Systems Research Testbed	
	<b>Royal Society Research Grant</b> , £20K, sole PI	Oct 2024 – Oct 2025
	Confidential Computing at a Scale	
	<b>EPSRC Core Equipment Award</b> , £35K (my share), Co-I	Jan 2023 – Mar 2023
	(my part) Systems Research Testbed	
	<b>EPSRC New Investigator Award</b> , £385K, sole PI	Apr 2022 – Mar 2025
	NetPM: Co-designing Data Management and Networking Principles for Persistent Memory	
	<b>NCSC RISE Proof-of-Concept</b> , £45K, co-PI	Oct 2021 – Mar 2022
	Follow on Project: Gupt - A Hardware Assisted Secure and Private Data Analytics	
<b>OTHER HONORS</b>	<b>Nominee for Teaching Award</b> , Outstanding Course category, University of Edinburgh	Apr 2023
<b>STUDENT SCHOLARSHIP</b>	<b>Research Fellowship for Young Scientists (DC1)</b>	Apr 2009 – Mar 2012
	Japan Society for the Promotion of Science, 9.2M JPY	
	<b>Excellent Young Researcher Overseas Visit Program</b>	Apr 2010
