

# Michio Honda

Room 1.02a, Informatics Forum, 10 Crichton Street, Edinburgh EH8 9AB, UK  
michio.honda@ed.ac.uk • +44 (0)131 650 2710 • <https://micchie.net>

INTERESTS	<b>Computer Networks and Operating Systems</b>	
EDUCATION	<b>Keio University</b> , Tokyo Japan	
	<b>Ph.D.</b> in Graduate School of Media and Governance Program: Cyber Informatics Thesis: The Internet is not an Internet—Principles, Evasion and Implications for Transport Protocols	Apr 2009 – Mar 2012
	<b>M.S.</b> in Graduate School of Media and Governance Program: Cyber Informatics Thesis: Bidimensional-Probe Multipath Congestion Control for Shared Bottleneck Fairness	Apr 2007 – Mar 2009
	<b>B.S.</b> in Faculty of Environment and Information Studies Thesis: Fast Transport Layer Handover Using Single Wireless Interface	Apr 2003 – Mar 2007
WORK EXPERIENCE	<b>Lecturer (Assistant Professor)</b> , School of Informatics, University of Edinburgh <b>Senior researcher</b> , NEC Laboratories Europe, Heidelberg, Germany <b>Software engineer</b> , NetApp, Munich, Germany <b>Research scientist</b> , NEC Laboratories Europe, Heidelberg, Germany	Jan 2020 – present Nov 2016 – Dec 2019 Dec 2014 – Oct 2016 Jul 2012 – Nov 2014
RESEARCH EXPERIENCE	<b>Visiting student researcher</b> , University College London (UCL), London, UK Advisor: Prof. Mark Handley Focus: Middlebox, Multipath Transport Protocol. <b>Research intern</b> , Nokia Research Center, Espoo, Finland Advisor: Dr. Lars Eggert Focus: Multipath Transport Protocol.	Apr 2010 – Sep 2010 Jul 2008 – Jan 2009
AWARDS	<b>Google Research Scholar Award</b> <b>Facebook Research Award</b> , Networking Request for Proposals <b>Best paper award</b> , ACM SOSR'15 <b>Community award</b> , USENIX NSDI'12 <b>Applied Networking Research Prize (ANRP)</b> , 82th IETF meeting	Apr 2022 Aug 2021 Jun 2015 Apr 2012 Nov 2011
RECENT RESEARCH	<b>Prism: Content-Aware Routing over TCP</b> Prism enables content-aware routing of arbitrary-sized, encrypted application data over TCP, unlike the existing systems that rely on a custom UDP-based protocol. Prism modernizes the TCP handoff in the aid of programmable switches for robust operation and conformance to relevant features in recent Linux kernels. <b>PASTE: A Network Stack for Non-Volatile Main Memory</b> HotNets'21, NSDI'18, HotNets'16, ATC'16 PASTE is a network stack that offers unified abstractions of network and non-volatile main memory. It fills the gap between the storage and network stacks designed in isolation, and solves the problem with the costs of moving and transforming data between these stacks that are significant for non-volatile main memory that offers fast, byte-addressable persistence. <b>A Storage Stack for SoC-Based Accelerators</b> This work is motivated by the slow storage access in the applications that run in the PCIe-attached accelerator devices equipped with general-purpose CPU cores in addition to the specialized ones. It explores direct storage access architecture that bypasses the host CPUs, process or kernel, while providing useful abstractions to the applications. <b>mSwitch: A Highly-Scalable, Modular Software Switch</b> SOSR'15, CCR'14, NSDI'14, SoCC'17 mSwitch solves the scalability problem of existing software switches that is crucial to consolidate a large number of VMs or virtualized network functions by a novel packet forwarding algorithm and streamlined data path. It was initially designed for ClickOS, a tiny unikernel that runs Click, and MultiStack, a framework that runs multiple user-space network stacks. <b>Middlebox Measurement for TCP Extensibility</b> This work was motivated by exploring viable design of Multipath TCP. It transmits various non-existent TCP traffic that mimics possible future TCP extensions to our server and examines on-path actions to the packets. This is the first work that examines in-depth middlebox behaviour prevalent in the Internet.	NSDI'21 HotStorage'20 IMC'11, NSDI'12

SERVICE	<b>USENIX ATC, Program Committee</b>	2017, 2018 and 2020–2022
	<b>ACM HotStorage, Program Committee</b>	2022
	<b>USEINX OSDI, Preview Session (OS &amp; Hardware)</b>	2021
	<b>ACM/IEEE ANCS, Program Committee co-chair</b>	2021
	<b>ACM CoNEXT, Program Committee</b>	2021 and 2022
	<b>ACM EuroSys, Program Committee and Registration/Finance co-chair</b>	2021
	<b>ACM/IEEE SC, Program Committee</b>	2019
	<b>ACM/IEEE ANCS, Program Committee</b>	2018
	<b>ACM SOSR, Program Committee</b>	2018
	<b>ACM EuroDW, Program Committee</b>	2018
	<b>ACM/IEEE ToN, Reviewer</b>	2017–2018
	<b>ACM SOSP poster, Program Committee</b>	2013
TEACHING	<b>Introduction to Programming (Informatics) Summer</b> , University of Edinburgh	July 2021 and 2022
	<b>Programming Club</b> , University of Edinburgh	Fall 2020 and Spring 2021
	<b>Computer Communications and Networks</b> , University of Edinburgh	Spring 2021 and 2022, and fall 2022
	<b>Data Structures and Programming</b> , Keio University	Fall 2011
	<b>Fundamentals of Information Technology</b> , Keio University	Spring 2011
MENTORING	Tianyi Gao, primary PhD supervision, University of Edinburgh	Fall 2022
	Tianyi Gao, MSc and intern supervision, University of Edinburgh	Spring 2022
	Steven W. D. Chien, Postdoc supervision, University of Edinburgh	Spring 2022
	Shuo Li, primary PhD supervision, University of Edinburgh	Fall 2021
	Shinichi Awamoto, primary PhD supervision, University of Edinburgh	Spring 2021
	Shinichi Awamoto, intern at NEC, Tokyo University	Fall 2019
	Yutaro Hayakawa, MSc thesis intern at NEC, Keio University	Fall 2018
	Nanako Momiyama, intern at NEC	Spring 2017
	Kenichi Yasukata, mentor at NEC	Fall 2016
	Nanako Momiyama, remote BSc thesis supervision, Keio University	Fall 2016
	Yutaro Hayakawa, BSc thesis intern at NetApp, Keio University	Fall 2016
	Kenichi Yasukata, MSc thesis intern at NetApp, Keio University	Fall 2015
GRANTS (EXHAUSTIVE)	<b>Google Research Scholar Award</b> , \$60K, sole PI	May 2022 – Apr 2023
	Upcycling Packets as Persistent In-Memory Data Structures	
	<b>Facebook Research Award</b> , \$50K, sole PI	Nov 2021 – Oct 2022
	Flexible transport scale-out with modern NICs	
	<b>EPSRC New Investigator Award</b> , £385K, sole PI	Apr 2022 – Mar 2025
	NetPM: Co-designing Data Management and Networking Principles for Persistent Memory	
	<b>NCSC RISE Proof-of-Concept</b> , £45K, co-PI	Oct 2021 – Mar 2022
	Follow on Project: Gupt - A Hardware Assisted Secure and Private Data Analytics	
R&D	<b>Fed4IoT</b> (H2020 No. 814918)	Jul 2018 – Dec 2020
COLLABORATIONS	The Federation for IoT (Fed4IoT) project aims at integrating heterogeneous IoT platforms and devices by virtualizing resources at multiple levels, including devices, platforms and information. Project volume is € 3 million in total.	
	<b>SSICLOPS</b> (H2020 No. 644866)	Feb 2014 – Jan 2018
	The Scalable and Secure Infrastructures for Cloud Operations (SSICLOPS) focuses on cloud networking techniques in software-defined data centers and across wide-area networks. Project volume is € 7 million.	
SCHOLARSHIP	<b>Research Fellowship for Young Scientists (DC1)</b>	Apr 2009 – Mar 2012
	Japan Society for the Promotion of Science, 9.2M JPY	
	<b>Excellent Young Researcher Overseas Visit Program</b>	Apr 2010
	Japan Society for the Promotion of Science, 1M JPY	
	<b>Young Leader Scholarship</b>	Apr 2009
	Keio University, 1M JPY
